SCIENTIFIC
AND INNOVATION SYSTEM
OF FRIULI VENEZIA GIULIA

**THE HUMAN
TOUCH**

**THE PROTAGONISTS
OF RESEARCH
AND INNOVATION**

AN INTEGRATED NETWORK

The Scientific and Innovation System - SiS FVG is an integrated network of 17 institutions engaged in Research, Development and Innovation in Friuli Venezia Giulia, a region recognised as a strong innovator by the European Regional Innovation Scoreboard (RIS) of the European Commission*.

Thanks to the presence of **high-level scientific expertise** from all over the world and **a wide range of internationally recognised research infrastructures**, this region represents the ideal place to conduct Research & Development activities.

SiS FVG brings together **17 partners**, active from basic research to development and technological transfer of results to businesses:

THE VISION

Launched in 2004 as the “Coordination of Research Institutions”, SiS FVG has strengthened **collaborations among R&I institutions in Friuli Venezia Giulia** since 2016, creating impacts on the region’s economy and society.

SiS FVG is an initiative of the Friuli Venezia Giulia Autonomous Region, in collaboration with the Italian Ministry of Foreign Affairs and International Cooperation and the Italian Ministry of University and Research.

Area Science Park, a national public research institution, supports the implementation of SiS FVG’s activities.

The commitment of SiS FVG partners focuses on:

- Creating a **scientific network of excellence** to enhance the region’s competitiveness and promote the socio-economic effects of research activities
- Rationalising regional **research** and **technology transfer** structures towards businesses
- Promoting and implementing **internationalisation support services**
- **Disseminating** science and innovation, spreading their results.

ACTIVITIES

- Strengthening **integrated research infrastructures** and developing **joint research projects**
- Consolidating **partnerships** and **international cooperation initiatives** for the benefit of the System
- Reinforcing the **internationalisation services** provided by the Welcome Office FVG, including hospitality, training, and cultural exchange among scientists, researchers, and students
- Conducting studies and creating **monitoring patterns on the flows** of incoming and outgoing international **researchers** and **students** in the Region
- Organising events, workshops, and periodic **dissemination of information for the general public** and the scientific and business community.
